Solution Courses Learning Path

Course	Format
1. Fundamentals	
<p>Workforce Mobility Fundamentals [2016]</p> <p>This eLearning course on VMware Workforce Mobility Fundamentals will provide a fundamental understanding of VMware's Workforce Mobility products and how these products solve the business and technical challenges with end-user computing. The course will start with an introduction to end-user computing and present some technical and business challenges faced by organizations with end-user computing. Next, you will take a look at the components of the VMware Digital Workspace Portfolio. Finally, you will relate the products in the VMware Workforce Mobility portfolio to the challenges they help resolve. Duration: 4.5 Hours</p> <p>View Details</p>	 eLearning
<p>Workforce Mobility Fundamentals [2014]</p> <p>The VMware Workforce Mobility Fundamentals course provides students with a fundamental understanding of VMware's Workforce Mobility products, including the business challenges those products are intended to solve. The course covers concepts of End User Computing and provides examples of common IT challenges faced by organizations who need to support EUC services and how VMware's products can help address these challenges. Students will get details on the VMware Workforce Mobility product line, including features specific to each product and how they can help resolve business and technical challenges. Duration: 3.0 Hours</p> <p>View Details</p>	 eLearning
<p>View [V6] and Mirage [V5]: What's New</p> <p>Duration: 1.0 Hours</p> <p>View Details</p>	eLearning

Desktop and Application Virtualization/Mobility

<p>Horizon 7: Install, Configure, Manage plus App Volumes Fast Track [V7.3]</p> <p>This intensive five-day, extended-hours course gives you the skills to deliver virtual desktops and applications through the VMware Horizon® 7 virtual desktop infrastructure platform. You will learn how to configure and deploy pools of virtual machines and how to manage access and security of the machines. You will also gain skills in application management using VMware App Volumes™ and VMware User Environment Manager™. You will learn how to use App Volumes to deliver applications and data to desktops and users in seconds and at scale, managing application lifecycles from installation to update and replacement. You will also learn how to use User Environment Manager to provide personalization and dynamic policy configuration across virtual, physical, and cloud-based environments to simplify end-user profile management. Product Alignment• VMware Horizon 7.3• App Volumes 2.10• User Environment Manager 8.7• VMware vSphere® 6.5 Duration: 5 Days</p> <p>View Details</p>	<p> Classroom Live Online Onsite vFlex Classroom</p>

Desktop and Application Virtualization/Mobility

<p>Horizon 7: Troubleshooting and Performance Optimization [V7]</p> <p>During this five-day, hands-on training, you will gain the advanced knowledge, skills, methodology, and abilities to achieve competence in troubleshooting the View component of VMware Horizon® 7. You will increase your skills and competence in using VMware and third-party tools to analyze and solve problems associated with a View implementation. This lab-intensive course provides you with a comprehensive environment to test your skills at identifying and solving a broad range of issues. Product Alignment• VMware Horizon 6• VMware Horizon 7• vSphere 6 Duration: 5 Days</p> <p>View Details</p>		<p>Classroom Live Online Onsite</p>
<p>Horizon 7: Design Workshop [V7]</p> <p>This three-day course presents a methodology for designing a VMware Horizon® solution. The design methodology includes recommendations for the type of information and data that must be gathered and analyzed to make sound design decisions for client systems, desktop options, VMware vSphere® infrastructure, and VMware Horizon components. VMware best practices are presented for each phase of the design process. In this course, you apply your new knowledge by working with other participants to design a VMware Horizon solution for a real-world project. Product Alignment• VMware Horizon 7.x Duration: 3 Days</p> <p>View Details</p>		<p>Classroom Onsite</p>

Workspace ONE Learning Path

Course	Format
1. Fundamentals	
VMware Workspace ONE Fundamentals This course introduces the VMware Workspace ONE portfolio, including its essential features and benefits. Duration: 1.5 Hours View Details	eLearning
2. Professional: Complete any 1	
Workspace ONE: Deploy and Manage This four-day course focuses on the skills that you need to effectively implement VMware Workspace™ ONE™. You will learn how to integrate the components of Workspace ONE into your enterprise environment to enable self-service access to cloud, mobile, and Windows applications. You will gain the necessary skills to effectively implement Workspace ONE to manage your digital workspaces across all devices and empower your employees with conditional access to the applications and content that they need. Hands-on labs provide the opportunity to configure and deploy an instance of Workspace ONE. Students should bring their own devices to class to complete the lab exercises. Anyone using an iOS device should ensure they are running iOS 10+ for optimal performance. This course is also available as a self-paced On Demand course. Product Alignment• VMware AirWatch® Enterprise Mobility Management™ V9.2• VMware Identity Manager V2.8• Workspace ONE V2.3 Duration: 4 Days View Details	Classroom Live Online Onsite On Demand

Identity Manager Learning Path

Course	Format
1. Fundamentals	
VMware Identity Manager Fundamentals [V2.6] This course provides an overview of VMware Identity Manager™ and explains how it helps IT administrators and end users in business mobility and application security. This course also explains the different solutions that can be integrated with Identity Manager, providing application provisioning, self-service catalog, conditional access controls and Single Sign-On (SSO) for SaaS, web, cloud and native mobile applications. In addition, it demonstrates how to deploy and administer Identity Manager. Duration: 1.5 Hours View Details	eLearning
2. Professional: Complete any 1	
VMware Identity Manager: Deploy and Manage with AirWatch This two-day course focuses on the basic skills that you need to effectively incorporate VMware Identity Manager™ with your existing software-as-a-service implementation of VMware AirWatch®. The course includes a hands-on component in which you will configure VMware Identity Manager to sync with Active Directory and VMware AirWatch. You will gain the necessary skills to effectively manage the VMware Identity Manager console and deploy applications on a conditional basis. Students should bring their own devices to class to complete the lab exercises. Anyone using an iOS device should ensure they are running iOS 10+ for optimal performance.
