Solution Courses Learning Path

Course	Format
1. Fundamentals	
Workforce Mobility Fundamentals [2016] <p>This eLearning course on VMware Workforce Mobility Fundamentals will provide a fundamental understanding of VMware's Workforce Mobility products and how these products solve the business and technical challenges with end-user computing. The course will start with an introduction to end-user computing and present some technical and business challenges faced by organizations with end-user computing. Next, you will take a look at the components of the VMware Digital Workspace Portfolio. Finally, you will relate the products in the VMware Workforce Mobility portfolio to the challenges they help resolve. Duration: 4.5 Hours</p> <p>View Details</p>	 eLearning
Workforce Mobility Fundamentals [2014] <p>Duration: 3.0 Hours</p> <p>View Details</p>	 eLearning
View [V6] and Mirage [V5]: What's New <p>Duration: 1.0 Hours</p> <p>View Details</p>	eLearning

Course	Format
1. Fundamentals	
Horizon 7 Fundamentals Duration: 4.0 Hours View Details	 eLearning
2. Professional: Complete any 1	
VMware Horizon 7: What's New [V6.x to V7.x] This three-day, hands-on course gives you the skills to upgrade from VMware Horizon® 6 to VMware Horizon® 7. It also introduces the new features in VMware Horizon 7 that enable you to deliver virtual desktops and applications through a single virtual desktop infrastructure platform. In addition to performing an upgrade, you will use many of the new features available in VMware Horizon 7 to instantly provision virtual and remote desktops and applications. This course is also available in an On Demand format. For more information, select this link: VMware Horizon 7: What's New [V6.x to V7.x]- On Demand.Product Alignment• VMware Horizon 7 Duration: 3 Days View Details	Classroom Live Online Onsite vFlex Classroom On Demand
VMware Horizon 7: Install, Configure, Manage [V7.3] This five-day, hands-on course gives you the skills to deliver virtual desktops and applications through a single virtual desktop infrastructure platform. This course builds your skills in installing, configuring, and managing VMware Horizon® 7 through a combination of lecture and hands-on labs. You will learn how to configure and deploy pools of virtual machines, how to manage the access and security of the machines, and how to provide a customized desktop environment to end users. This course is also available in an On Demand format. For more information, select this link: VMware Horizon 7: Install, Configure, Manage [V7.3] - On Demand.Product Alignment• VMware Horizon 7.3 Duration: 5 Days View Details	 Classroom Live Online Onsite vFlex Classroom On Demand

VMware Horizon 7: Install, Configure, Manage plus App Volumes Fast Track [V7.3]

This intensive five-day, extended-hours course gives you the skills to deliver virtual desktops and applications through the VMware Horizon® 7 virtual desktop infrastructure platform. You will learn how to configure and deploy pools of virtual machines and how to manage access and security of the machines. You will also gain skills in application management using VMware App Volumes™ and VMware User Environment Manager™. You will learn how to use App Volumes to deliver applications and data to desktops and users in seconds and at scale, managing application lifecycles from installation to update and replacement. You will also learn how to use User Environment Manager to provide personalization and dynamic policy configuration across virtual, physical, and cloud-based environments to simplify end-user profile management. ****Special Offer**** Attend a VMware delivered Fast Track course and receive a free VCP Exam voucher to use toward certification. **Product Alignment** • VMware Horizon 7.3 • App Volumes 2.10 • User Environment Manager 8.7 • VMware vSphere® 6.5
Duration: 5 Days

Horizon 7: Troubleshooting and Performance Optimization [V7]

During this five-day, hands-on training, you will gain the advanced knowledge, skills, methodology, and abilities to achieve competence in troubleshooting the View component of VMware Horizon® 7. You will increase your skills and competence in using VMware and third-party tools to analyze and solve problems associated with a View implementation. This lab-intensive course provides you with a comprehensive environment to test your skills at identifying and solving a broad range of issues. **Product Alignment** • VMware Horizon 6 • VMware Horizon 7 • vSphere 6

VMware Horizon 7: Design Workshop [V7]

This three-day course presents a methodology for designing a VMware Horizon® solution. The design methodology includes recommendations for the type of information and data that must be gathered and analyzed to make sound design decisions for client systems, desktop options, VMware vSphere® infrastructure, and VMware Horizon components. VMware best practices are presented for each phase of the design process. In this course, you apply your new knowledge by working with other participants to design a VMware Horizon solution for a real-world project. Product Alignment • VMware Horizon 7.x
Duration: 3 Days

Workspace ONE Learning Path

Course	Format
1. Fundamentals	
VMware Workspace ONE Fundamentals This course introduces the VMware Workspace ONE portfolio, including its essential features and benefits. Duration: 1.5 Hours View Details	eLearning
2. Professional: Complete any 1	
VMware Workspace ONE: Deploy and Manage [V9.x] In this five-day course, you will configure and secure unified endpoint activation, registration, and authentication. You will learn how to integrate industry-recognized enterprise technologies with VMware Workspace™ ONE™. Through a combination of hands-on labs, simulations, and interactive lectures, you will learn how to configure and manage the endpoint lifecycle. The principles of enterprise mobility, unified endpoint, and identity management are addressed throughout the course. You will leave the training empowered with the foundational skills and knowledge needed to effectively implement Workspace ONE. This course is also available in an On Demand format. For more information, select this link: VMware Workspace ONE: Deploy and Manage [V9.x] - On Demand . <p>VMware Workspace ONE: Extending your AirWatch Deployment to the Digital Workspace</p> <p>This two-day course focuses on the basic skills that you need to effectively incorporate Workspace ONE Identity Manager™ with your existing software-as-a-service implementation of Workspace ONE UEM (VMware AirWatch®). The course includes a hands-on component in which you will configure Workspace ONE Identity Manager to sync with Active Directory and Workspace ONE UEM. You will gain the necessary skills to effectively manage the digital workspace, enable SSO for web apps and enable conditional access. Students should bring their own devices to class to complete the lab exercises. Anyone using an iOS device should ensure they are running iOS 10+ for optimal performance. This course is also available in an On Demand format. For more information, select this link: VMware Workspace ONE: Extending your AirWatch Deployment to the Digital Workspace - On Demand. Identity Manager Learning Path

Course	Format
1. Fundamentals	
VMware Identity Manager Fundamentals [V2.6] This course provides an overview of VMware Identity Manager™ and explains how it helps IT administrators and end users in business mobility and application security. This course also explains the different solutions that can be integrated with Identity Manager, providing application provisioning, self-service catalog, conditional access controls and Single Sign-On (SSO) for SaaS, web, cloud and native mobile applications. In addition, it demonstrates how to deploy and administer Identity Manager. Duration: 1.5 Hours View Details	eLearning

vRealize Operations for Horizon Learning Path

Course	Format
1. Fundamentals	
<p>vRealize Operations for Horizon Fundamentals</p> <p>The VMware vRealize Operations for Horizon eLearning course gives an overview of the new features in vRealize Operations for Horizon and provides visibility into the health, performance, and efficiency of virtual desktops and application environments. The course highlights the key features of vRealize Operations for Horizon and its components, outlines the pre-requisites for installing vRealize Operations for Horizon, and describes the installation and configuration process. The course also provides details on various user interface elements and how they are used to investigate and troubleshoot potential issues in the vSphere environment.</p> <p>Duration: 2.5 Hours</p> <p>View Details</p>	<p>eLearning</p>
